

ODSB SaaS Pricing Policy

Policy Information

Policy Name: SaaS Pricing Policy

Policy Reference: ODSB/****/***/*

Policy Owner: Head of Sales & Customer Support Division, ODSB

Approval Authority: Board of Directors, Olive Digital Sdn Bhd

Effective Date: [DD Month YYYY]

Review Cycle: Every five (5) years or as required

Version: 1.0

Policy Classification: Confidential

A. Introduction

A1 Purpose

1. This SaaS Pricing Policy establishes the principles, framework, and governance governing the pricing of services provided by Olive Digital Sdn Bhd (“ODSB”) through the Olive digital ecosystem.
2. ODSB operates the Olive platform as a Software-as-a-Service (SaaS) digital platform, providing digital applications, platform infrastructure, and related technology services to entities within the BIBD Group and, where applicable, external organisations.
3. The purpose of this policy is to ensure that services delivered through the Olive digital ecosystem are priced in a structured, transparent, and commercially sustainable manner that supports the continued development, operation, and expansion of the Olive platform. This policy establishes:
 - (a) the pricing principles applicable to services delivered through the Olive platform;
 - (b) the pricing models used for different categories of platform services;
 - (c) the cost components considered when determining service pricing; and
 - (d) the governance and approval framework governing pricing decisions.
4. Through this policy, ODSB establishes a consistent pricing framework aligned with commercially reasonable practices applicable to digital platform service providers.

A2 Scope

5. This policy applies to all services delivered by ODSB through the Olive digital ecosystem under a Software-as-a-Service (SaaS) delivery model.
6. These services may include:
 - (a) digital platform applications;
 - (b) digital identity services;
 - (c) compliance and risk management systems;
 - (d) financial and corporate software systems;

- (e) artificial intelligence and data analytics services;
- (f) private or hybrid cloud platform services and implementation;
- (g) software integration and implementation services; and
- (h) digital transformation consulting and advisory services.

7. The policy applies to:

- 1. services provided to entities within the BIBD Group; and
- 2. services provided to external clients where applicable.

A3 Service Agreements

- 8. The provision of services by ODSB shall be governed by the relevant contractual agreements executed between ODSB and the client.
- 9. Depending on the nature of the relationship, such agreements may include:
 - (a) Inter-Company Service Agreements for services provided to related entities;
 - (b) Master SaaS Agreements governing SaaS services provided to clients; and
 - (c) Service Orders or subscription arrangements specifying the services subscribed to.
- 10. These agreements define the specific services subscribed to and the commercial terms governing service provision.
- 11. Where applicable, service agreements may reference the Olive Service Catalogue and the Olive Service Pricing Schedule to determine applicable services and pricing.
- 12. The provision of SaaS services shall remain subject to applicable regulatory requirements, outsourcing approvals, and service level arrangements where relevant.

A4 Olive Service Catalogue

- 13. ODSB shall maintain an Olive Service Catalogue documenting the services offered through the Olive digital ecosystem.
- 14. The Service Catalogue provides a structured listing of:

- (a) service modules;
- (b) platform services;
- (c) application capabilities; and
- (d) professional services delivered through the platform.

15. The catalogue serves as the primary operational reference for identifying services available for subscription.

A5 Olive Service Pricing Schedule

16. The detailed pricing applicable to services listed in the Olive Service Catalogue shall be maintained in a separate document known as the Olive Service Pricing Schedule.

17. The Service Pricing Schedule specifies:

- (a) service codes;
- (b) service names;
- (c) pricing models;
- (d) charging units; and
- (e) applicable service rates.

18. Maintaining pricing in a separate schedule allows service rates to be updated when necessary without requiring amendments to this policy.

A6 Confidentiality of Pricing Methodology

19. The pricing methodology and cost considerations described in this policy form part of ODSB's internal commercial framework.

20. Information relating to internal cost structures, pricing methodology, and margin determination shall be treated as commercially sensitive and confidential and shall not be disclosed to clients, including entities within the BIBD Group, or to external parties, except where disclosure is required by applicable laws, regulatory authorities, or authorised internal audit, risk management, or governance functions.

21. For transparency, Clients shall instead be provided with applicable service descriptions and pricing through the Olive Service Catalogue, the Olive Service Pricing Schedule, and the relevant service agreements.

B. Definitions

22. For the purposes of this policy, the following terms shall have the meanings set out below.
- (a) **Olive Digital Sdn Bhd (ODSB):** Olive Digital Sdn Bhd, the entity responsible for developing, operating, and providing digital platform services through the Olive ecosystem.
 - (b) **Olive Ecosystem:** The integrated digital platform environment developed and operated by ODSB that provides digital applications, platform services, infrastructure services, and supporting capabilities to clients.
 - (c) **Software-as-a-Service (SaaS):** A software delivery model under which applications and platform services are hosted and operated by ODSB and made available to clients through subscription-based access without requiring the client to deploy or maintain the underlying infrastructure.
 - (d) **Client:** Any organisation or entity that subscribes to and consumes services provided by ODSB through the Olive ecosystem. This may include entities within the BIBD Group as well as external organisations.
 - (e) **Olive Service Catalogue:** The document maintained by ODSB that lists the service modules, platform services, and application capabilities available within the Olive ecosystem together with their functional descriptions.
 - (f) **Olive Service Pricing Schedule:** The document maintained by ODSB that specifies the pricing model, charging unit, and applicable service rates for services listed in the Olive Service Catalogue.
 - (g) **Platform Subscription Fee:** A recurring fee charged for access to the Olive platform environment and the associated platform services provided by ODSB.
 - (h) **Usage-Based Fee:** A service fee calculated based on the volume of service usage, such as the number of transactions processed, digital onboarding events performed, or digital identity services utilised.

- (i) **Integration and Implementation Services:** Professional services provided by ODSB to configure, integrate, or deploy Olive platform services for a client, including system integration and implementation activities required prior to operational use.
- (j) **Change Request:** A request by a client for modifications, enhancements, or new functionality that falls outside the standard capabilities of the Olive platform services. Change requests are typically priced based on development effort.
- (k) **Third-Party Service Provider:** An external vendor or service provider whose services are integrated into the Olive ecosystem to support specialised capabilities such as identity verification, sanctions screening, or other regulatory or compliance-related services.
- (l) **Cybersecurity Assurance Services:** Security-related services including vulnerability assessments, penetration testing, security monitoring, and other security assurance activities required to maintain the security and resilience of the Olive platform environment.
- (m) **Arm's-Length Pricing:** A pricing principle under which services are priced in a manner consistent with the price that would reasonably be charged between independent parties under comparable circumstances.
- (n) **Intercompany Service Agreement:** A contractual agreement governing the provision of services between ODSB and related entities.
- (o) **Master SaaS Agreement:** A contractual agreement governing the provision of SaaS services by ODSB to clients, defining the commercial and operational terms applicable to the use of the Olive platform services.
- (p) **Service Pricing Model:** The pricing structure applied by ODSB to determine how services are charged, including subscription pricing, usage-based pricing, integration fees, and development charges.

C. Pricing Principles

23. The pricing of services delivered through the Olive digital ecosystem shall be guided by the following principles.

- (a) **Arm's-Length Pricing**

Services provided by ODSB shall be priced in accordance with arm's-length principles to

ensure that service pricing reflects market-equivalent pricing for comparable digital platform services. ODSB's commercial positioning shall focus on the quality, reliability, and capability of its digital solutions rather than price-based competition.

(b) **Commercial Sustainability**

Pricing shall support the long-term sustainability of the Olive digital ecosystem by ensuring that infrastructure, development, operational, and security costs are adequately supported.

(c) **Market Alignment**

ODSB shall consider prevailing market practices and pricing benchmarks when determining service pricing.

(d) **Value-Based Pricing**

Service pricing may consider the operational efficiencies, digital capabilities, and strategic value delivered by the Olive platform.

(e) **Non-Discriminatory Pricing**

Clients subscribing to similar services under comparable conditions shall be subject to consistent pricing structures unless justified by differences in service scope, usage levels, or infrastructure requirements.

(f) **Transparency and Consistency**

Service pricing structures shall be documented through the Olive Service Catalogue and the Olive Service Pricing Schedule.

(g) **Scalability of Services**

Pricing structures shall support the scalable nature of SaaS platform services, allowing charges to increase in line with service usage or infrastructure requirements.

(h) **Periodic Pricing Review**

ODSB shall periodically review service pricing to ensure continued alignment with operational costs, inflationary trends, technological developments, and prevailing market conditions. Where necessary, service rates may be updated through revisions to the Olive Service Pricing Schedule in accordance with the governance framework established under this policy.

D. Service Pricing Model

24. ODSB adopts a modular SaaS pricing structure for services delivered through the Olive digital ecosystem, whereby individual platform modules and services may be priced using a combination of platform subscription fees, tiered usage-based charges, implementation services, consulting services, and third-party service charges.
25. Services may be priced using a combination of pricing models including platform subscription fees, usage-based charges, implementation and integration services, change request development charges, consulting services, and third-party service charges.

D1 Platform Subscription Fee

26. Clients subscribing to services delivered through the Olive digital ecosystem shall be charged a platform subscription fee.
27. The platform subscription fee represents the client's annual subscription to access the Olive digital platform environment and the subscribed service modules.
28. The subscription fee covers:
 - (a) access to the Olive platform infrastructure;
 - (b) access to subscribed applications and modules;
 - (c) platform infrastructure provisioning;
 - (d) routine platform maintenance and upgrades;
 - (e) operational monitoring and platform management; and
 - (f) baseline cybersecurity protections.
29. For operational billing purposes, the subscription fee may be invoiced periodically in accordance with the terms specified in the applicable service agreement.

D2 Usage-Based Fees

30. Certain services within the Olive ecosystem are priced based on measurable system usage.

31. Usage-based charges may apply to services such as:
- (a) digital onboarding events;
 - (b) identity verification processes;
 - (c) digital signature transactions;
 - (d) authentication events; and
 - (e) other platform transaction services.
32. Usage-based charges may be invoiced periodically, including quarterly billing cycles, based on system usage metrics recorded by the platform.

D3 Integration and Implementation Services

33. Clients requiring integration with Olive platform services shall be charged a one-time integration and implementation fee. These services may include:
- (a) tenant environment provisioning;
 - (b) system configuration and integration;
 - (c) secure connectivity setup;
 - (d) system integration testing;
 - (e) operational readiness support; and
 - (f) client onboarding and training.
34. Fees are determined based on the project scope and estimated resource effort required.
35. Where ODSB provides system implementation, integration, or platform configuration services, pricing may be determined based on the estimated effort required to deliver the services. Such estimates may be expressed in man-days or other effort-based units and used as the basis for preparing client quotations.
36. ODSB may internally track the actual effort expended in delivering the services for project management, cost monitoring, and internal governance purposes.
37. Where the scope of work materially changes from the original estimate, ODSB may revise the quotation or agree with the client on a variation to the implementation charges.

38. The applicable professional service rates used for effort-based pricing shall be specified in the Olive Service Pricing Schedule.

D4 Change Requests and Enhancements

39. Client-requested system changes or enhancements beyond standard platform capabilities shall be charged based on development effort.
40. Such work is typically priced on a man-day basis using development rates specified in the Olive Service Pricing Schedule.

D5 Consulting and Advisory Services

41. ODSB may provide consulting and advisory services supporting digital transformation initiatives, platform implementation, system integration, and other technology-related initiatives.
42. Such services may be charged based on time-based consulting rates or project-based pricing defined in the Olive Service Pricing Schedule.

D6 Third-Party Service Provider Fees

43. Certain Olive platform services rely on third-party providers performing specialised functions such as identity verification, sanctions screening, messaging services, national or international leased line connectivity, or infrastructure hosting services.
44. Where such services are utilised, the associated third-party costs may be charged to the client together with a reasonable service administration margin covering integration, vendor management, operational support, and platform maintenance. The applicable charging structure shall be defined in the Olive Service Pricing Schedule.

D7 Cybersecurity Assurance Services

45. ODSB maintains a comprehensive cybersecurity framework to ensure the security and resilience of the Olive digital ecosystem.

46. Where specialised security testing or assurance services are required for a specific client implementation, associated vendor costs may be charged to the client together with an applicable service margin defined in the Olive Service Pricing Schedule.

D8 Combined Pricing Structure

47. Clients may be charged using a combination of pricing components including:
- (a) platform subscription fees
 - (b) tiered usage-based fees
 - (c) integration and implementation services
 - (d) consulting services
 - (e) development charges for change requests
 - (f) third-party service provider charges.
48. The applicable pricing structure for each client shall be defined in the relevant SaaS service agreement.

D8 Platform Licensing and White-Label Services

49. In addition to providing Software-as-a-Service (SaaS) platform access, ODSB may offer platform licensing or white-label deployment arrangements for organisations that require the Olive platform or specific platform components to be deployed under their own brand or within their own operational environment.
50. Such arrangements may include:
- (a) licensing of Olive platform modules for deployment by third-party financial institutions or organisations;
 - (b) white-label deployments of Olive applications customised for the client's brand and operational requirements;
 - (c) dedicated or single-tenant platform deployments where required by regulatory, security, or operational considerations; and

- (d) long-term platform licensing arrangements for financial institutions operating outside the BIBD Group.
- 51. Pricing for platform licensing or white-label services may include one or more of the following pricing components:
 - (a) platform licensing fees;
 - (b) annual platform subscription or maintenance fees;
 - (c) implementation and deployment fees;
 - (d) customisation and development fees;
 - (e) integration services; and
 - (f) usage-based charges for platform services.
- 52. The pricing structure for such arrangements shall be determined based on the scope of deployment, infrastructure requirements, licensing rights granted, and the operational responsibilities undertaken by ODSB.
- 53. Where platform licensing or white-label services are provided, the commercial terms shall be defined in the applicable licensing agreement or service agreement executed between ODSB and the client.

E. Service Catalogue and Service Pricing Schedule

- 54. The detailed service rates applicable to each service shall be maintained separately in the Olive Service Pricing Schedule. Separating the Service Pricing Schedule from this policy allows service pricing to be updated operationally without requiring amendments to this SaaS Pricing Policy.
- 55. The Olive Service Catalogue defines the services available within the Olive digital ecosystem, while the Olive Service Pricing Schedule defines the applicable pricing structure and service rates for those services.
- 56. Each service listed in the Service Catalogue shall include:
 - (a) a service code

- (b) service name
 - (c) service category
 - (d) pricing model
 - (e) charging unit.
57. ODSB shall maintain version control and appropriate internal approvals for updates to the Service Catalogue and Service Pricing Schedule in accordance with the governance framework set out in this policy.
58. Both documents form part of the operational pricing framework supporting the implementation of this SaaS Pricing Policy.

F. Cost Components & Pricing Methodology

59. ODSB determines service pricing by considering cost components associated with the development, operation, and maintenance of the Olive digital ecosystem.
60. These cost components may include:
- (a) platform infrastructure costs;
 - (b) software development and engineering costs;
 - (c) operational platform management costs;
 - (d) data centre and connectivity costs;
 - (e) platform licensing and technology stack costs;
 - (f) disaster recovery and business continuity costs;
 - (g) training, platform support, and maintenance costs;
 - (h) product development and innovation costs;
 - (i) compliance and regulatory costs;
 - (j) third-party service provider costs; and
 - (k) cybersecurity assurance and testing costs.

61. ODSB may apply a service margin when determining final service pricing in order to reflect the value delivered by the platform and to support continued investment in platform development, operational capabilities, and service innovation.
62. The underlying cost structures and pricing methodology shall be reviewed periodically to ensure continued alignment with operational costs, technological developments, and prevailing market practices.

G. Governance & Approval

G1 Ownership of Pricing Framework

63. The Head of Sales and Customer Support Division of ODSB shall be responsible for the commercial administration of this SaaS Pricing Policy, the Olive Service Catalogue, and the Olive Service Pricing Schedule.

G2 Approval of Pricing Policy

64. This SaaS Pricing Policy shall be approved by the Board of Directors of Olive Digital Sdn Bhd. Any material amendments to this policy shall require Board approval.

G3 Approval of Service Pricing

65. The detailed service pricing contained in the Olive Service Pricing Schedule shall be approved by the Managing Director of ODSB.

G4 Intercompany Pricing Governance

66. Where services are provided to entities within the BIBD Group, pricing shall be determined in accordance with arm's-length principles.
67. ODSB may reference comparable SaaS service providers, industry benchmarks, or cost-plus methodologies where appropriate.

G5 Pricing Exceptions

68. Where exceptional commercial circumstances justify deviations from the standard pricing set out in the Olive Service Pricing Schedule, such deviations shall require approval from the Managing Director of ODSB.
69. All pricing exceptions shall be properly documented together with the commercial justification for the deviation.

G6 Audit and Internal Review

70. The implementation of this policy may be subject to review by the Internal Audit function of ODSB to ensure compliance with the approved pricing framework.

G7 Periodic Review

71. ODSB shall review the SaaS pricing framework periodically and at least annually to ensure alignment with operational costs, technological developments, and prevailing market practices.
